

Parent and Guardian Update

ZESS

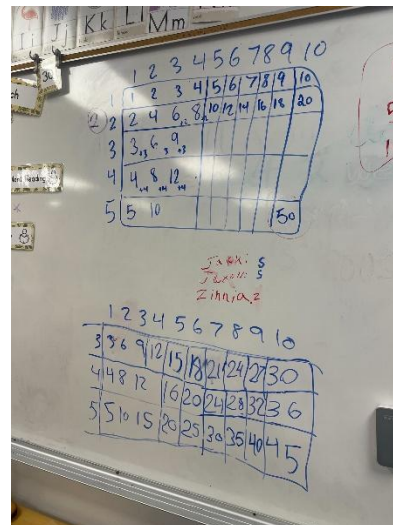

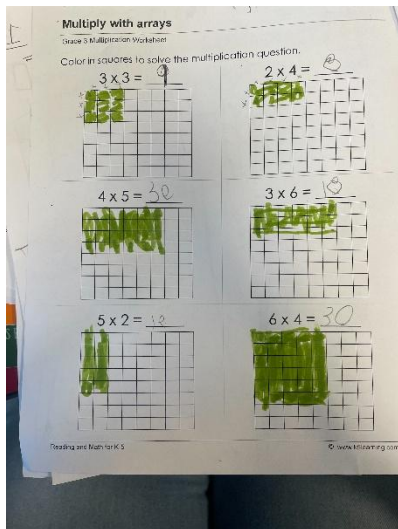

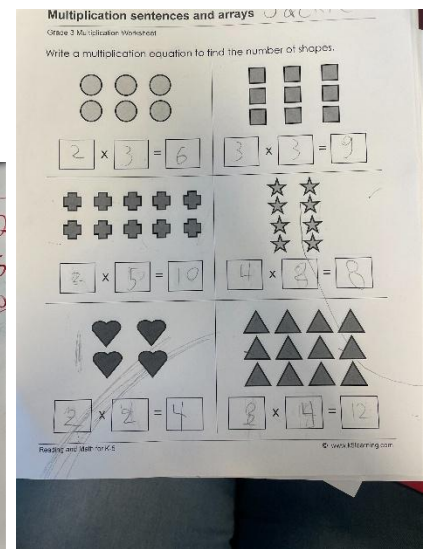

April 10, 2026

Upcoming Events

- April 14th – Evening – Parent Teacher Meetings – ½ Day for Students
- April 15th Earth Quake Presentations and Walk to Evacuation Site
- May 13th Cultural Sharing at GRSS

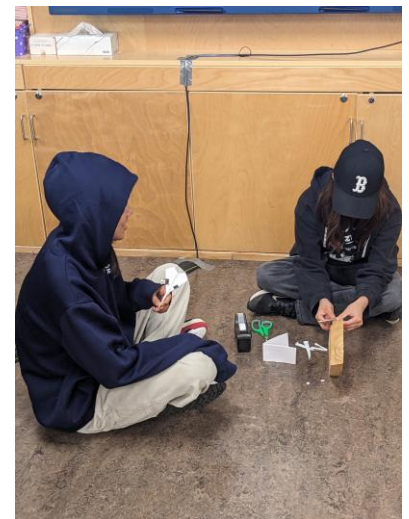

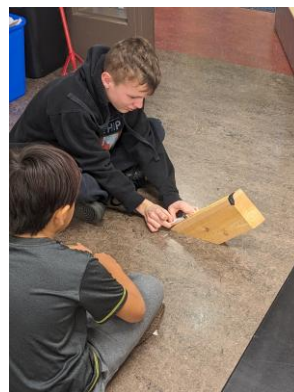

Primary (K-2): Mr. Christall - The primary class has begun its gardening endeavours for the season. Students carefully planted leek seedlings, a task made challenging with the overgrown starter pots, tangled roots, and delicate new plants. Students demonstrated great care and genuine concern for the young plants. We will commence our planting of seeds once the soil warms up a bit more.

Intermediate (3-4): Ms. Curtis: The grade 3/4 class has jumped into multiplication with enthusiasm! We've been working through building our understanding of the relationship between addition and multiplication.

What is happening in class?

5-7 Science: Mr. Barber – Students have been exploring Force using spring scales to measure the launch force of elastic band shuttles.

Students helped release about 8000 salmon to the estuary and enjoyed a snack by the river.
